Yes

2. What are your views on the Government narrowing or widening the definition of the scope of personal care products containing microbeads to be prohibited from manufacture and sale in New Zealand?

**Notes**

Microbeads are simply unnecessary. They are terrible for the environment and just like other plastic items, don't decompose. There are also plenty of natural alternatives such as ground almonds, aduki beans and even rice make great exfoliants.

**Position**

No

**Notes****Clause**

10. What would be the impact on you or your business if personal care products containing microbeads were prohibited for manufacture and sale in New Zealand and the alternatives were not reasonably practicable, readily available, or similarly priced?

**Notes**

micro beads are unnecessary and can easily be replaced and New Zealand and its oceans will be much better for it.
